

F2L Lookahead Arrows

Lookahead is looking at next F2L while solving current F2L, rather than looking at current F2L. This page includes the suggested algorithms of all 2-gen F2L [18] cases except the case where edge and corner are in place. Arrow denotes the action of F2L algorithms on other pieces. left image shows FR-slot arrows, right shows corner arrows in U. Edge arrows in U can be derived by images. Purple arrows denote one single move (Study them first); Grey arrows denote at least two moves. For simplicity, there are pre-AUF in some cases. There is no arrow on the piece not moving.

					
$U R U' R'$		$U' R U R'$		$(R U' R' U') (R U R')$	
					
$R' U2' R2 U R2' U R$		$(R U' R' U) (R U R')$		$(R U R' U2) (R U' R')$	
					
$(R U2' R' U2) (R U' R')$		$(R U2' R' U) (R U' R')$		$(R U R' U) (R U' R')$	
					
$(R U R' U2') (R U' R' U) (R U' R')$		$(R U2' R' U') (R U R')$		$(R U' R' U') (R U' R' U) (R U' R')$	
					
$F' (R U R' U') (R' F R)$		$U (R U' R' U) (R U' R')$		$U' (R U R' U') (R U R')$	
					
$(U R U' R')^3$		$U' (R U' R' U2) (R U' R')$		$U (R U R' U2') (R U R')$	

Examples

Assume solving WGR-GR F2L first. Remark on Scramble 1: this F2L algorithm is $(R U2' R' U') (R U R')$. Analyze two arrows acting on the other F2L: Action of arrow on WBR-corner (action of F2L algorithm) is equivalent to R' , which moves UBL corner to FUR; And action of arrow on BR-edge is equivalent to U' , which moves UL edge corner to UF. One can predict that this F2L is connected basic insert. Remark on Scramble 2: this F2L algorithm is $U' (R U' R' U2) (R U' R')$. Analyze two arrows acting on the other F2L: Action of arrow on WGO-corner is equivalent to $D' L'$, which moves RDF corner to UFL; And this F2L algorithm preserves GO-edge. One can predict that this F2L is top matched, wrong connected case.

Tip: Preserve UBR/UR

$R U(n) R' (n=\pm 1,2)$

Scramble 1:
 $x2 y L' U' L R U' R' U R U2 R'$

$(R U2' R' U') (R U R')$

Scramble 2:
 $x2 y R' U' R U R' U' R U2 R' U R U2 R U R' U2 R U R' U$

$U' (R U' R' U2) (R U' R')$
